

DermaLight Consent

Please read this information carefully, completely and discuss any questions you may have with your provider.

The DermaLight is FDA cleared for the following indications:

- Treatment of vascular lesions
- Treatment of pigmented lesions

The treatments are spaced apart every 2-4 weeks as needed. Photographs will be taken at each visit. Please come with no make-up or tanning agents on the skin. The procedure itself takes 12 to 45 minutes depending upon the size of treatment area. The sensation during treatment may range from prickly, rubber band snapping, to a burning/heat sensation.

Contraindications: Pregnant, active skin rash, cancer or lesions in the area

Risks include but are not limited to: Bleeding, bruising, swelling, scarring, allergy, delayed healing, sensitivity to light, acne, hyper or hypo pigmentation, infection

Downtime: Every patient has a different process. Downtime ranges from 5-14 days and depends on how aggressive the treatment is, how many lesions treated and the size of said lesions, and what you consider downtime to be. Typical appearance post treatment includes redness, skin texture irregularity, swelling, and darkening or graying of the treated lesion. The brown spots will typically scab and flake away on their own while the red vessels may disappear or reappear slowly/less prominent.

Informed Consent

I acknowledge that I have read and understand this information. I agree to the terms of this agreement and that I have had the opportunity to discuss the treatment details with my provider and address any questions I may have. I hereby consent to injectables performed by Danielle Stark PA. I hereby release Danielle Stark PA from any liability associated with adverse events or outcomes from this procedure.
